

WORKING FOR YOU 24/7

SecureTest Benefits

- Reduced mobile phone bills
- Real time visual testing
- More time efficient engineer visits
- Ease of use for engineers

SecureTest

AIM has a new mobile application for engineers which allows secure access to your monitored customer's information via a smart phone.

This allows engineers to place systems on/off test and easily navigate the history to ensure systems are set up correctly.

In three easy steps...

STEP ONE - ENTER YOUR LOGIN DETAILS

STEP TWO - ENTER A RANDOM SELECTION OF YOUR PASS CODE AS PRESENTED ON THE SCREEN

STEP THREE - SEARCH FOR YOUR CUSTOMER

info@aim-monitoring.co.uk
0344 800 1605

STEP ONE

Enter your login details

STEP TWO

Enter a random selection of your pass code as presented on the screen. This gives you added security should someone be shoulder surfing

STEP THREE

Search for your customer
Once you have your customers record up you can then carry out the following tasks:

- Place the system on test
- View site details
- View Contacts
- View Zones
- View Transmitters
- View URN's and Police status (if set up)
- View Site Notes (If set up)

Using SecureTest allows you to bypass the ARC saving engineer time when performing commissioning and maintenance checks to systems.

Other functions available to engineers are listed below when viewing the transmitters

- Resets can be carried (out if set up)
- Redcare classic and GSM systems can be upped
